# Front-End Developer

## Despre mine

Front-end developer skilled in building high-performance, user-focused web applications with modern JavaScript (ES6+), Tailwind CSS, and Bootstrap for responsive, visually appealing designs. I specialize in clean, scalable code using CSS preprocessors, BEM methodology, and component-based architecture for easy scaled and reusable code.

In addition to React, I have hands-on experience with Angular from an internship and foundational skills in Docker and Git/Github for version control. My UI/UX understanding, supported by Figma and Photoshop, enables me to design and implement visually engaging, user-friendly interfaces.

I have basic Agile Scrum methodologies understanding and able to use tools like Jira and Trello to drive efficient teamwork and project alignment. With a strong commitment to Core Web Vitals and responsive design principles, I deliver fast, accessible applications across all devices.

I also bring experience in custom WordPress and Shopify solutions (including E-Commerce), alongside familiarity with CI/CD processes. I'm excited to join a collaborative, innovative team focused on user experience and development excellence.

## Experiența profesională

### Front End Developer · Freelance

*Iunie 2021 - Prezent · 3 ani 6 luni*

- Designed and developed responsive websites using HTML5, CSS3, JavaScript, and PHP.

- Created custom WordPress themes, including WooCommerce stores.

- Developed and customized Shopify stores, integrating unique components & functionalities.

- Utilized Figma, Adobe Photoshop, and Adobe Illustrator for UI/UX design and branding.

- Implemented best practices to improve website visibility and ranking, always validating the code to meet industry standards and maintain page speed scores.

Competențe: Wordpress, Shopify, HTML5, CSS3, Javascript, Tailwind, Bootstrap
