Main goal: Make realistic virtual dog race game

Accomplished work:

- Sculpting race dogs, modeling race dog stadium, unwrapping, baking of maps, texturing, dog rigging, light and environment, camera position and moving, import and working with assets - «Anima crowd simulation», rendering (Octane). Broadcast graphics, compositing and post-processing.

Initiatives and problem salvation:

I created «game engine» inside Cinema 4D by using C.O.F.F.E.E and Python, every time you hit the render you've got random race result. Also using Xpresso I solved problems with camera moving regarding of every time changing dogs position.
